LIBRARY AS A LEARNING RESOURCE

4.2 LIBRARY AS A LEARNING RESOURCE

The Library, in today's context is a modern Learning Resource Centre with a dynamic learning space where students undertake a journey of knowledge acquisition and intellectual enrichment. The RVS CET library holdings in terms of books, journals, e-resources and other learning materials and technology-aided learning mechanisms which enable students to acquire information, knowledge and skills required for their study programmes. A recent development in the field due to availability of digital means, the functioning of the library has undergone a drastic change. Automation of library using the ILMS, use of e-journals and books, providing remote access to e-resources in the library have become a matter of necessity. Providing this learning space initiates a positive change in the RVS CET literary and research oriented environment, with a service that offers improved responsiveness and greater efficiency among students. RVS CET Central Library is Wi-Fi Library. Separate website for RVSCET Central Library is available (<https://rvscet.ac.in/library/>).

ICT facilities are available in RVS CET Central Library. ICTs enable RVS CET Central Library to locate, store, retrieve and disseminate information. ICT has influenced traditional set up. Whenever college curriculum is updated and new courses are introduced, then college library has to keep up to these challenges by updating its collection and services where ICT plays its role in the library. All these developments in the RVS CET institutional environment plus developments in ICT, and emergence of new media in information world has forced libraries to change their role and shoulder newer responsibilities.

BAR CODING BASED LIBRARY

In an automated environment every document should be unique and searchable. It is done through bar coding. Bar coding facilitates the searching, circulation and systematic shelving of the concerned document. After entering all the details regarding the documents into the database, barcodes are printed on adhesive labels according to the accession number of the document. The polyester bar code label has been pasted on the on the Top middle of the cover page left side, copyright page and secret page of the book. User ID card contains bar coded college Roll No. of the student and staff.

Barcodes are used in libraries to label books, CD & DVDs, **Project Reports and Back Volumes**. It contains all information about the Books and Non Book materials. In Library Management system, whenever a student return or issue a book the system fetch the bar code number and we can make entry of book in computer systematically. Library Management system helps in systematic management of books.

The application of barcode scanners in managing a library is most successful due to its speed, accuracy and reliability. It provides a simple and inexpensive method of encoding text information that is easily read by inexpensive electronic readers. Barcoding also allows data to be collected rapidly and with extreme accuracy.

4.2.1

**LIBRARY IS AUTOMATED
USING INTEGRATED
LIBRARY MANAGEMENT
SYSTEMS (ILMS)**

4.2.1 LIBRARY IS AUTOMATED USING INTEGRATED LIBRARY MANAGEMENT SYSTEM (ILMS)

The AutoLib Integrated Library Management System (ILMS) is the fully automated version which was established in the year 2013 and it has been updated with the new version namely AutoLib V2023.01.

ABOUT INTEGRATED LIBRARY MANAGEMENT SYSTEM (ILMS)

The main aim of RVS CET Central Library is to provide access to proper information, to the right users in the shortest time possible. The institution has an automated Central Library and a Library at department level. The Central Library is auto managed by AutoLib Library Management Software Version 2023.01. The integrated operations enable the institution to manage the library automatically and efficiently. It considerably enhances the reference, borrowing, return of books very easy for the users. It saves a lot of time and energy for the librarian as well as the users. The AutoLib software updates records, ensures dynamic reporting and oversight capabilities. This facility improves issuing of books and its return and facilitate user related access.

The Central Library facilitates remote access of library resources using Internet and intranet to students and faculty.

The institution Central library has twenty highly configured computer systems. The following Library activities are fully automated by using the web based AutoLib Library Management software Using Java Technologies.

INTRODUCTION

AutoLib - is completely a web based Library Management Software (LMS), designed and developed and promoted by AutoLib Software Systems, Chennai using latest JAVA Technologies. It can handle lakhs of records more efficiently. AutoLib has many integrated modules to take care all the technical, in-house activities and also provide various services such as cataloging module - to create databases for various types of documents and also users, Circulation Management System - to monitor all the transactions in a library such as issue, return, renewal, reservation, etc, Serial Control module - to maintain periodical subscription and management, Acquisition module - to procure various resources, Report Management System to generate various reports and statistics. Besides these, many additional modules are also available to handle all other activities. The Admin module allows to set-up various parameters for library policies; rules and regulation related to transactions and other access facilities.

Email, SMS integration facility is also available to alert users giving information about overdue of the documents borrowed by them and also other transaction details.
